

# STOP THE ROLLBACKS OF CLEAN WATER PROTECTIONS

The administration wants to take us back five decades in our water cleanup efforts.

Unless we stop them, water protections will be rolled back for wetlands and small streams. That means mining, manufacturing and industrial farm waste could affect the water we all depend on for drinking, fishing, swimming, and kayaking.

**We can't allow this to happen.  
We need more, not less protections  
for clean water.**

*Visit [www.NPCA.org/cleanwater](http://www.NPCA.org/cleanwater)  
to speak up for National Parks  
and clean water!*

**YOUR PARKS. YOUR TURN.**

**100 YEARS**
